

WHAT IS CLAIMED IS:

1. A door weather strip for attachment to a periphery of a door of a motor vehicle, the door weather strip comprising:

an extruded member; and

a molded part for connecting ends of said extruded member, said extruded member being composed of a foamed thermoplastic olefin elastomer which has an average cell diameter of 30 to 70  $\mu$ m and an expansion ratio of 150 to 250 %.

2. A door weather strip as claimed in claim 1, wherein said foamed thermoplastic olefin elastomer is prepared by chemical foaming.

3. A door weather strip as claimed in claim 1, wherein said molded part is composed of a non-foamed thermoplastic olefin elastomer having a hardness of Hs 40° to 50°.

4. A door weather strip as claimed in claim 1, wherein said foamed thermoplastic olefin elastomer has a low deformation tensile stress of 300 Kpa or less.
